## FEATURES IN A GLANCE

**Student Management System:** Features transactions and activities for managing the entire lifecycle of a student in the school. From Enrollment to the Final TC Issuance, the module features the activities pertaining to both Academic and institution level management activities. The system also provide extracurricular, Co-curricular performance, Health related information of the students. The system supports and is flexible for customizing on CBSE, ICSE and International Curriculum requirements

**Customizable Reports and Forms Generation:** Each module contains the report section which generates custom and user defined reports. The reports can be exported to pdf, word and other formats.

**Fee Management System:** The system Fee Chart option allows to design the fee collection pattern of the school based on individual needs such as monthly, quarterly fee, annual fee. Fee discounts for the second, third kid of a parent. Allows easy payment mechanism for parents through online and defined payment patterns. The outstanding fee can be tracked and reminded through the SMS System and is updated in accounts as receivables ensuring accurate financial figures at any point of time.

**Payroll and HR Management:** The system has been built, used and tested specifically to help the needs of Middle East labor rules of leave, payment and reports. Teachers and Non-teaching staff can retrieve their pay slips, leave records and other official data with ease in customizable formats

## MODULES SUMMARY

Modules in OC are well integrated such that data entered in one module is made available in corresponding areas of other modules

**Financial Accounting System:** The accounting system is powered by the widely used Biznet application from us. The system ensures real-time update to the financial data from all modules ensuring round the clock accuracy of the information. The proposed dashboard will enable the school authorities to make good decisions supported by the data analysis and Intelligence

**Asset Management:** Each asset in the institution is logged, mapped and tracked through its life cycle. The module features bar code creation, as set value calculation and Depreciation calculation based on standard norms.

**Transport Management:** Pickup, Drop points, Driver, Vehicle details of the students are tracked here. This module is integrated to the fees system such that the transportation fee collection is managed as well.

**SMS Management System:** The SMS Module helps to send messages to students or parents based on predefined triggers like fee payment due, annual student report issue, events and also allow custom messaging to chosen numbers

**Timetable Management:** School timetable can be created by providing predefined data inputs. System caters the needs of Work Adjustment for teachers. The confirmed timetables are made available in Student and Teacher portals.

**Examination Management and QA Bank:** Manage the examinations effectively with planning based on predefined information along with the question bank which helps quick exam preparation for teachers

**Event Management:** Manage and inform the events happening in the institution. Assign responsibilities and track till closure. Integrated to SMS and Email gateways

**Ministry Forms:** Based on the geography, schools often require submitting various forms to the governmental organizations. The system simplifies this form generation and reduces the overhead effort by generating the forms using the data in the system. This reduces time and ensures data accuracy in the forms.

## PORTALS

### STUDENTS LOGIN FEATURES

The student portal acts as a one stop shop for the student to access his academic and institution level information and interact with his teachers and team. Portal features General information, School news and updates, Academic and attendance reports, Download options for diaries, worksheets, Assignments and Previous question papers, Upload options for students creative works, Student Time table, Internal teacher communication facilities and Forums for discussion
